

# When you test positive

Test : There are **“Official tests”** and **“Unofficial tests”**

**[Official** = PCR test center, medical antigen test kit (medical approved, In-vitro diagnostics)]

**[Unofficial** = OIST special PCR test, antigen test kit provided by OIST, antigen test kits for research use]

### Home treatment + contact the people who have had close contact with you

- Contact and alert people who have had close contact with you in the two days prior to the date of your test or onset of symptoms.
- During the quarantine period, record your health condition using [My HER-SYS](#)
- Please monitor your health conditions until the end of home treatment. Okinawa public health center will NOT notify you the period. (Please refer the points to check below)

### Home treatment periods and points to check

**With symptoms :** The day of symptoms onset is **Day 0**, stay home 7 days and will be released on Day 8. No symptoms for the last 24 hours.

**No symptoms:** The day of you tested is Day0, stay home 7 days and will be released on Day8. No symptoms until Day 7. (If you take a medical antigen test kit on Day 5 and got a negative result, will be released Day 6)

Go to work or school  
(Negative Test Result is not required)
