Overview

The OIST Graduate School International Administration Forum provides a space for university officials and staff across Japan to connect, exchange practices, and address the evolving demands of international graduate education. In its second year, the forum offers a practical, peer-based platform to explore four key focus areas:

- **International student recruitment and outreach**
- **Comprehensive student support systems**
- **Staff development for a globally responsive administrative workforce**
- **Collaboration with industry to expand doctoral career pathways**

The program includes an expert-led workshop on effective communication in English and a separate session focused on strategies for international student recruitment. Participants will explore techniques for conveying complex and sensitive messages to diverse students and faculty in a second language, and work collaboratively to develop recruitment approaches, putting cross-institutional partnerships into action from day one.
