No.	項目	質疑事項	回 答
1	Specification (2) Configuration - Storage system 2-14 Infiniband cable (3) Storage system 3-14 Infiniband cable	GPFS node has 10Gb/s SFP+ interface, so would like to propose not only Infiniband but 10GbE for the best configuration. If you can accept above suggestion, Could you add cable for 10Gb/s SFP+ in RFP ? Will propose cables mixed Infiniband and 10Gb/s SFP+ up to 30, maximum totally 52 sets.	Yes we can accept mixed Infiniband and 10GbE configuration for the storage expansion. Please see "訂正公告" (an announcement of correction) for more detail.
